## Election/Restriction

This application contains claims directed to the following patentably distinct species of the claimed invention: (I) Type of metal foam to be selected from aluminum, aluminum alloys, titanium, titanium alloys, nickel, nickel alloys, copper, copper alloys, iron, iron alloys, zinc, zinc alloys, lead, lead alloys, silver, silver alloys, gold, gold alloys, platinum, platinum alloys, tantalum, and tantalum alloys. And, (II) Type of polymer to be selected from epoxies, acrylics, silicones, polyurethanes, polyimides, polyvinyls, polycarbonates, natural rubbers, synthetic rubbers, phenolics, polyolefins, polyamides, polyesters, fluoropolymers, poly(phenylene ether ketones), poly(phenylene ether sulfones), poly(phenylene sulfides) and melamine-formaldehyde resins.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3 and 17-22 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations

Serial Number: 08/845,897 Page 3

Art Unit: 1771

of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- 3. While an examilation of the claims have not been completed by the examiner, the examiner did notice the following possible 35 USC § 112, second paragraph problems. In claim 23, lines 3-5 are idiomatic in that the phrase "said metal foam being...no smaller than 3 times the diameter of the cells" is vague. Does this refer to the thickness of the metal foam? Or the diameter of the metal foam? Also, in claim 23, line 5, one of the "." (Period symbols) should be deleted.
